Session 2 – Coordination of Health Systems Strengthening

Overview of work programme and approval of work plan Area 1

Some considerations:

- Participatory process for developing the workplan – plans for further consultation regarding implementation

- Partner driven technical working groups

- Translation of strategies and TORs for technical working groups: from pillars/activities to **outcomes/deliverables**

- Outcomes within a two year process: level of ambition to be commensurate – e.g. **coordination** vs. intended effects of coordination

- Framework for country work: **country value** vs. country level activities

International Health Partnership

Deliverables	
PFM	- Good practice of FM harmonisation and alignment - Policy brief on PFM issues in health - Report on lessons learned from support to FM harmonisation and alignment
Fragile and conflict affecting settings	- Mainstreaming of issues across UHC2030 work and networks - Guidance on improved coordination across development and humanitarian stakeholders + support to 2-3 countries/context - Problem solving support with peer exchange on critical HS related bottlenecks (e.g. health workers salaries)
Sustainability and transition	- 2 knowledge sharing products (co-authored by TWG members) - Guidance and good practice principles for sustainability and transition from external finance - Coordinated country support for transition in 3 countries
Health systems assessment	- Common template to present results from health systems assessment + recommendation for a country driven process - A knowledge platform around health systems performance to support cross-country learning
Multisector approach for UHC	- Broad consultation to draw attention to the importance of the health sector taking steps to building capacity for multisector efforts for health as part of UHC - Policy brief on functions required for multisector efforts - Country case studies on experience linked to national UHC plans
Effective development cooperation	- Policy brief on contribution to effective development cooperation to support SDG implementation and implications for financial instruments and modalities - Existing IHP+ tools updated : JANS, JARS, country compacts, mutual accountability frameworks - Demand driven country support for use of tools

Questions for discussion

- Does the proposed area of work provide a good basis for pursuing work on improved coordination of HSS for UHC as well as building on the effective development cooperation agenda?

- Consideration to guide discussion:
    - Prioritisation/focus on tangible deliverables
    - Unique value of UHC2030: convening, connecting, deep diving
    - Potential benefits for country level work
    - Contribution to/from UHC2030 networks
