HSR2016 Satellite Session, Tuesday 15th November 12:30-2:30 PM, Conference Room 2

Effective Development Cooperation for Health Systems Strengthening – some perspectives of UHC2030

The International Health Partnership (IHP+) is evolving to become the International Health Partnership for UHC 2030 (UHC2030). The session will broadly describe the partnership, and then focus on the development effectiveness aspects of it, namely joint assessments, knowledge management, the successes and continued challenges in achieving better coordination around health systems strengthening, and examples of how UHC2030 can promote the use of research to strengthen health systems.
